

# HOW ARE THE WASHERS AND DRYERS WE INSTALL PROMOTING ENVIRONMENTAL SUSTAINABILITY?

## THE POWER OF PLANTING TREES

### OUR CARBON OFFSET PROGRAM FOR A GREENER TOMORROW

For every washer and dryer we installed in 2024, a tree was planted. These trees were situated in a restored wetland area adjacent to the Harriet Tubman National Park and the Blackwater National Wildlife Refuge. Through this program, we aim to foster a deeper connection between our customers and the environment, encouraging sustainable living practices for a greener future.

# BENEFITS OF TREE PLANTING

**CARBON OFFSET, AIR QUALITY, SUPPORTING WILDLIFE HABITAT.**

This initiative not only helps to offset the carbon emissions generated by the use of these machines but also contributes to the enhancement of local ecosystems. These trees will improve air quality, and support wildlife habitats, creating a healthier and more sustainable environment for everyone.

By participating in this program, we contribute to reducing our carbon footprint and promoting climate resiliency.
